

## High Speed Horizontal Flow wrapping Machine

MODEL	
Packaging area (LxWxH)	(30-270)x(20-140)x(1-65)mm
Bag Length range	120-300mm
Max film width	400mm
Supply voltage	Ac220 V 50Hz
Packing speed	20-150
Total power	3kw
Dimensions	3900X900x1500mm

Automatic High-speed pillow packing machine is a microcomputer controlled intelligent automatic packing machine which makes the operation simple and convenient. Adjustable ingenious structure, so it can adapt to a variety of standard packaging materials, and the performance stability, sealing neat and clean. The machine space suitable for cookies, snacks, sausages, instant noodles, medicines, etc.

## Biscuit Making Machine

Biscuit Making Machine is an automatic production line for the set of baking, grouting, injection filling, turn folders, cooling as one of the automatic production line, with the high degree of automation, energy saving, high-yield characteristics. production quality, suitable for today's packaged food products. By adopting a different sandwich (such as red bean paste, pulp, etc.) can produce different flavors of food. Manufacturing Process:

1. Raw materials - mixing complete
2. The host-Automatic filling ingredients - banking automatic Note fillings - Automatic translation folder
3. Conveyor - Cooling - Sterilization
4. Automatic Charter - one gold package - great packaging - packing - Finished goods - Sales
